Brief Description of Arguments to be Presented:

Qualcomm fails to teach or suggest "triggering generation of a registration message based on a change in flow and frequency... if the second frequency is not known to the network based on a first flow identifier information previously registered by the mobile station" as recited in claim 1.

Sinnaraja fails to teach similar limitations recited in claim 1.

Deficiencies in Sinnaraja in view of 3G-1x-BCMCS do not render claims 1, 5, 10 obvious.
